

Reformation fiber standards

Goal of 95% of all Ref Production		Not Preferable for Ref Production		Never use
A All stars	B Better than most	C Could be better	D Don't use unless certified	E Never Use (unless under 10% of content)
Recycled Cotton *Global Recycled Standard (GRS) certification required	Organic Cotton/Transitional Cotton *GOTS certification required for >70% *OCS certification required for <70% *Proof of transitional cotton required *Supply chain mapping down to the farm level *Ability to develop a relationship with the farm as needed to ensure fair and safe working conditions are met	Alpaca *Traceability to ensure alignment with Animal Welfare Policy *GOTS certification preferred	Silk *Bluesign certification required for solid dyed and preferred for prints *Oeko-Tex certification and digital print process required for facilities that are not Bluesign certified	Conventional Silk
TENCEL™ Lyocell *Lenzing verification letter required	Fair Trade Cotton *Fair trade certification required	Organic Wool *GOTS certification required *Must be non-mulesed sheep wool	Responsible Wool *Responsible Wool Standard (RWS) Certification required *Must be in a blend with recycled content fiber *Must be non-mulesed wool	Conventional Cotton
TENCEL™ X REFIBRA™ Lyocell *Lenzing verification letter required	Canopy green shirt Viscose *Must be FSC certified *Green shirt ranking in canopy hot button report	Canopy engaged Viscose *Must be FSC certified *Producer has signed Canopy policy and is working towards improvements	FSC certified Viscose	Conventional Wool & Cashmere
Organic Linen *Global Organic Textile Standard (GOTS) certification required	Conventional Linen	**Chemically Recycled Nylon *Outerwear, accessories, dresses	Leather *Leather (cow, goat, sheep) *Traceability to ensure alignment with Animal Welfare Policy and protection from deforestation *Vegetable tanned or chrome-free tanned *Leather Working Group (LWG) certified (rated Gold or Silver w/ traceability score) *Or have other third-party verification meeting equivalent ecological criteria	Conventional Acrylic
Organic Hemp *GOTS certification required	Conventional Hemp	**Chemically Recycled Polyester ^1** *Physical traceability and content verification required at fiber level *Outerwear, accessories, dresses	Cashmere *Fiber must be The Good Cashmere Standard certified by AbTF *Traceability to ensure alignment with Animal Welfare Policy	Recycled Acrylic *TBJ & Dresses
Regenerative/Transitional Regenerative Cotton *Verification required for regenerative practices and ecological outcomes *Farm level traceability required	TENCEL™ Modal *Lenzing Verification Letter required	PU Leather Poly/Nylon/Polyamide blend *Recycled/Biosynthetic content blends preferred *If forest based, FSC certification required *If recycled, GRS certification required *If biobased, RSB or ISCC+ certification preferred	Recycled Polyester *Fiber must be The Good Cashmere Standard certified by AbTF *Traceability to ensure alignment with Animal Welfare Policy	Conventional Viscose
Jute	Recycled Wool *Cardato Regenerated CO2 Neutral Products certification or GRS certification required	Biobased Synthetics *RSB, USDA bio-preferred or ISCC+ certification preferred	Conventional Nylon *TBJ	Recycled Nylon *TBJ
Ramie	Recycled Cashmere *GRS certification required	Regenerated Nylon *GRS certification required	Conventional Polyester	Recycled Polyester (rPET) *TBJ
Deadstock Materials *Deadstock verification required	Recycled Acrylic *Outerwear, accessories, swim, sweaters *GRS certification required	Regenerative/Transitional Regenerative Leather *Verification required for regenerative practices and ecological outcomes *Farm level traceability required	Spandex ***	PVC
Post-consumer Recycled Leather *GRS certification required	Mechanically Recycled Nylon *Outerwear, accessories, swim, dresses *GRS certification required	Biobased PU/EVA Foams *If recycled, GRS certification required *RSB or ISCC+ certification preferred	Fur	Conventional Polyester
Naia™ Renew	Mechanically Recycled Polyester ^1 *Outerwear, accessories, swim, dresses *GRS certification required	Recycled EVA *GRS certification or facility verification required	Angora & Mohair	Recycled Polyester (rPET)
Cork	Regenerative/Transitional Regenerative Wool *Verification required for regenerative practices and ecological outcomes *Farm level traceability required	Recycled ABS *GRS certification or facility verification required	Conventional TPU	Conventional Rubber
	Natural Rubber *FSC certification required	Recouro		
	Recycled Rubber *GRS certification or facility verification required	Recycled TPU *GRS certification or facility verification required		
		Recycled Lycra *GRS certification required		
		Biobased Lycra *RSB or ISCC+ certification preferred		

For all recycled and organic certifications, we require scope certificates from each facility prior to PO being placed. Transaction certificates must be issued after PO is placed for full supply chain.

*Specific application is based on washing frequency in relation to garment type/care instructions. Therefore, resulting in a lower classification.

** If closed loop chemically recycled nylon & polyester then it is considered "Better Than Most"

***If Spandex is needed for construction, the percentage can go up to 20%

^1 Feedstock can be: rPET or polyester garments
 rPET: abbreviated term for recycled polyester
